AL BORDWÄNDE, BORDWANDPROFILE 30/40/60/65mm

ALUMINIUM DROPSIDES, DROPSIDE PROFILES 30/40/60/65mm

**DE**

Al-Bordwandprofile ermöglichen eine beliebige Zusammensetzung der Bordwände nach Bedarf. Verstärkte Innenwand der Profile sichert lange Lebensdauer. Nach Zusammenstellung der Profile sind diese nicht mehr voneinander zu trennen. Abschlussprofile werden an die Bordwand angeschweißt. Höhe der Einzelprofile beträgt 100, 150, 175 und 200mm. Stärke der Bordwand beträgt 30 oder 40mm, einige Profile ermöglichen Stärke 60, 65 oder 70mm.

**Wichtigste Eigenschaften der Al-Bordwände:**

- niedriges Gewicht
- hohe Festigkeit
- Korrosionsbeständigkeit
- einfache Montage
- minimale Wartungsanforderungen
- modernes Design

**EN**

Aluminium profiles are suitable for assembly of Dropsides based on customer request. Internal wall is made thicker for stiffness and longer service life. When the profiles are clicked together, it is not possible to disassemble them. Edges are always welded to the Dropside. The heights of single profiles are 100, 150, 175 or 200mm. The width of Dropsides are 30 or 40mm according to the module and some of them (40mm) can be extended to 60 and 65mm to provide better strength.

**Basic characteristic of aluminium Dropsides:**

- low weight,
- high firmness,
- corrosion resistant,
- easy assembly,
- minimum service needed,
- modern design.

**KIPPER 30mm / TIPPER 30mm**

**DE**

Al-Bordwände 30mm ermöglichen Innenbreite bis zu 2480mm. Bordwände werden in Teilen oder als Satz inklusive Rungen, Scharniere und Verschlüsse geliefert. Bordwandhöhe ist von Anforderungen transportierter Ware abhängig und kann auch aus Aufsatzwänden zusammengestellt werden. Bordwände werden um das untere Scharnier aufgemacht oder nach Entsicherung um das obere Scharnier. Am häufigsten werden die Kippaufbauten in Wirtschaft oder Bauwesen eingesetzt, für Transport von Schüttgütern oder in Kombination mit hydraulischem Kran.

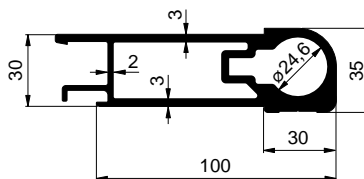

**EN**

Aluminium Dropside allows to have internal width of the structure 2480mm. Dropsides can be supplied as parts or as complete set even with pillars, hinges and locks. Dropside height is adjusted depending on the requirements of the cargo with a possibility of 2 part execution/design/version. Dropside can be opened using top or bottom hinges. Hinges let to open top or bottom part of Dropsides. Mostly used for agriculture, building industries, substrates transport or a combination with crane.
