ALU-SV®

## Superstructure with side flap

Large panel flaps are nothing new to us. The flap is commonly used at sales stands. However, this side flap is designed for a canvas superstructure.

The replacement for the panel flap is a welded steel construction of aluminum alloy and tarpaulin.

- LIGHTWEIGHT ALL-ALUMINIUM CONSTRUCTION
- QUICK OPENING OF THE WHOLE SIDE
- PROTECTION AGAINST RAIN DURING LOADING
- DURABLE ALUMINIUM SELF-SUPPORTING FLOOR
- FITTED DESIGN FOR HYDRAULIC PLATFORM
- SIDEWALL PROTECTION ON THE FRAME

Subject to technical changes.
